CloudML

A DSL for model-based realization of applications in the cloud

Master thesis

Eirik Brandtzæg

Spring 2012

CloudML

Built: 15th February 2012

Abstract

Contents

List of Figures

List of Tables

Preface

Part I

Introduction

Short and sharps

- Main introduction
- Write lastly

Chapter 1

Background

Explain some of the topics in my thesis.
Here it is possible to introduce case study (BankManager) to ease writing

- Find a new title, 'Background' is too plain

- What is cloud computing and IaaS

    - Summarize nist definition of cloud
    - Short description of AWS
    - Short description of Rackspace

- What is model-based engineering and benefits.
  Core concepts

Chapter 2

State of the Art in Provisioning

Evaluation of existing solutions
What have others done for multicloud provisioning
Even more examples in mOSAIC articles

- Identify *properties* (problems in reality)

- Find more sources

- Model driven

    - Amazon CloudFormation
    - CA Applogic

- APIs

    - libcloud
    - jclouds
    - Deltacloud

- Deployments

    - Amazon Beanstalk
    - simplifying-solution-deployment-on-a-cloud-through-composite-appliances
    - architecture-for-virtual-solution-composition-and-deployment

Chapter 3

Problem definition with examples

- Outline the problem

  - Information dependency at runtime
  - Technical competence/level expectations
  - Reproducibility
  - Robustness
  - Complexity
  - Shareable

- Why is it important to solve the problems

  - Cloud domain is state of the art
  - model driven approach with benefits (no special tooling)
  - Easier for businesses (especially SMBs) to reach out to Cloud
  - Easier for larger more time-constraint businesses to try out the cloud
  - Opening the eyes of big providers for a larger cross-cloud language

Chapter 4

Requirements to solution (with table)

- Copy in my existing table from the essay
  Requirements = challenge = problem?

Part II

Contribution

Chapter 5

Vision, concepts and principles

Chapter 6

Analysis and design - CloudML

- Copy chap 3 from CloudMDE

- Weaknesses

Chapter 7

Implementation/realization - cloudml-engine

- More info than CloudMDE
- Technologies chosen
- Why technologies were chosen

Chapter 8

Validation on example/experiments - BankManager

Part III

Conclusion

Short and sharp

- Summary of CloudML
    - What subsection in solution solves what subsection in problem
- CloudML
- Implementation
- Perspectives (2 paragraphs, can be section)
    - Look into the future
        * Deployments
    - short term
    - long term

Chapter 9

Results
